Key Insights & Recommendations

Key Insights

- Customers on Month-to-Month contracts exhibit the highest churn rate compared to long-term contract holders.
- Customers without Tech Support services show significantly higher churn behavior.
- Higher Monthly Charges are associated with increased customer attrition.
- Customers enrolled in long-term contracts (One-Year and Two-Year) demonstrate better retention and lower churn rates.

Business Recommendations

- Encourage customers to shift from month-to-month plans to long-term contracts through discounts and loyalty benefits.
- Bundle Tech Support and Online Security services with subscription plans to increase engagement and reduce churn.
- Monitor customers with high monthly charges and introduce personalized retention offers.
- Develop targeted retention campaigns focusing on high-risk customer segments.
